

"We'll have to act quickly!"

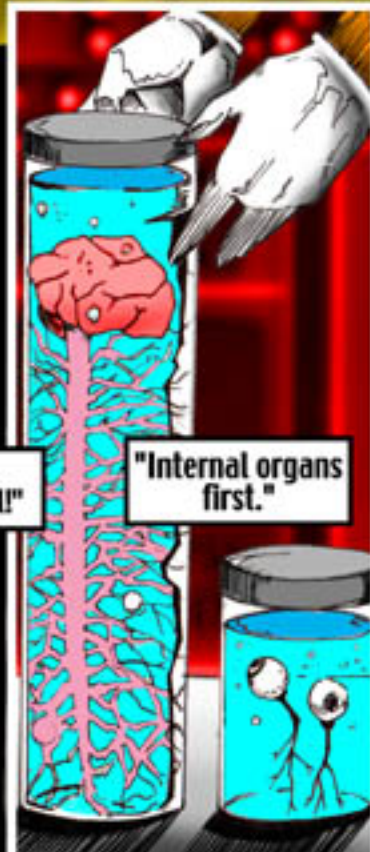

"Do you think the process will work?"

"I wouldn't be here if I didn't."

"The instruments are ready, doctor!"

"Lets make
history...Scapel!"

"Internal organs
first."

The computer shows the vital
signs are strong. Now lets
introduce the cybernetic
synapses to the neuron system.

Now after years of planning my research
can be completed. This is the last phase
in my brothers experiments. Activate the
cyberactive cells.

Begin the
final process.

At last I will show the world! they shouldn't have laughed at me. They said transplating mutated cells from living organs into a man made structure to create new life was ludicrous!

It's unbelievable!

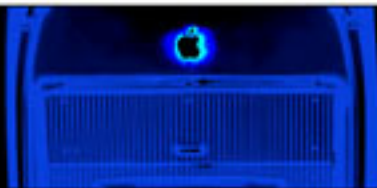

Your a genius, Doctor!

It's monstrous!

Who's laughing now!

ENERGIZE!!!

```
username:  
password:  
run program:  
processing...  
subject online  
all systems functional  
FULL ALERT!!!
```

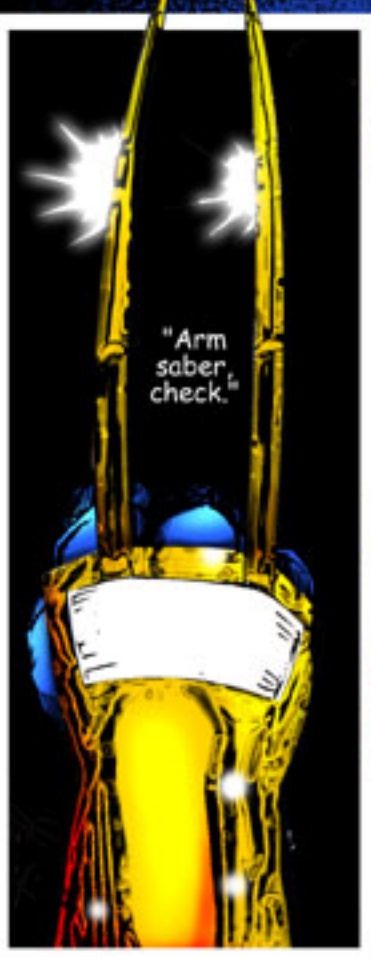

"Wrist lasers, check!"

"Optical disrupters, check!"

Data is positive.
We are fully operational.

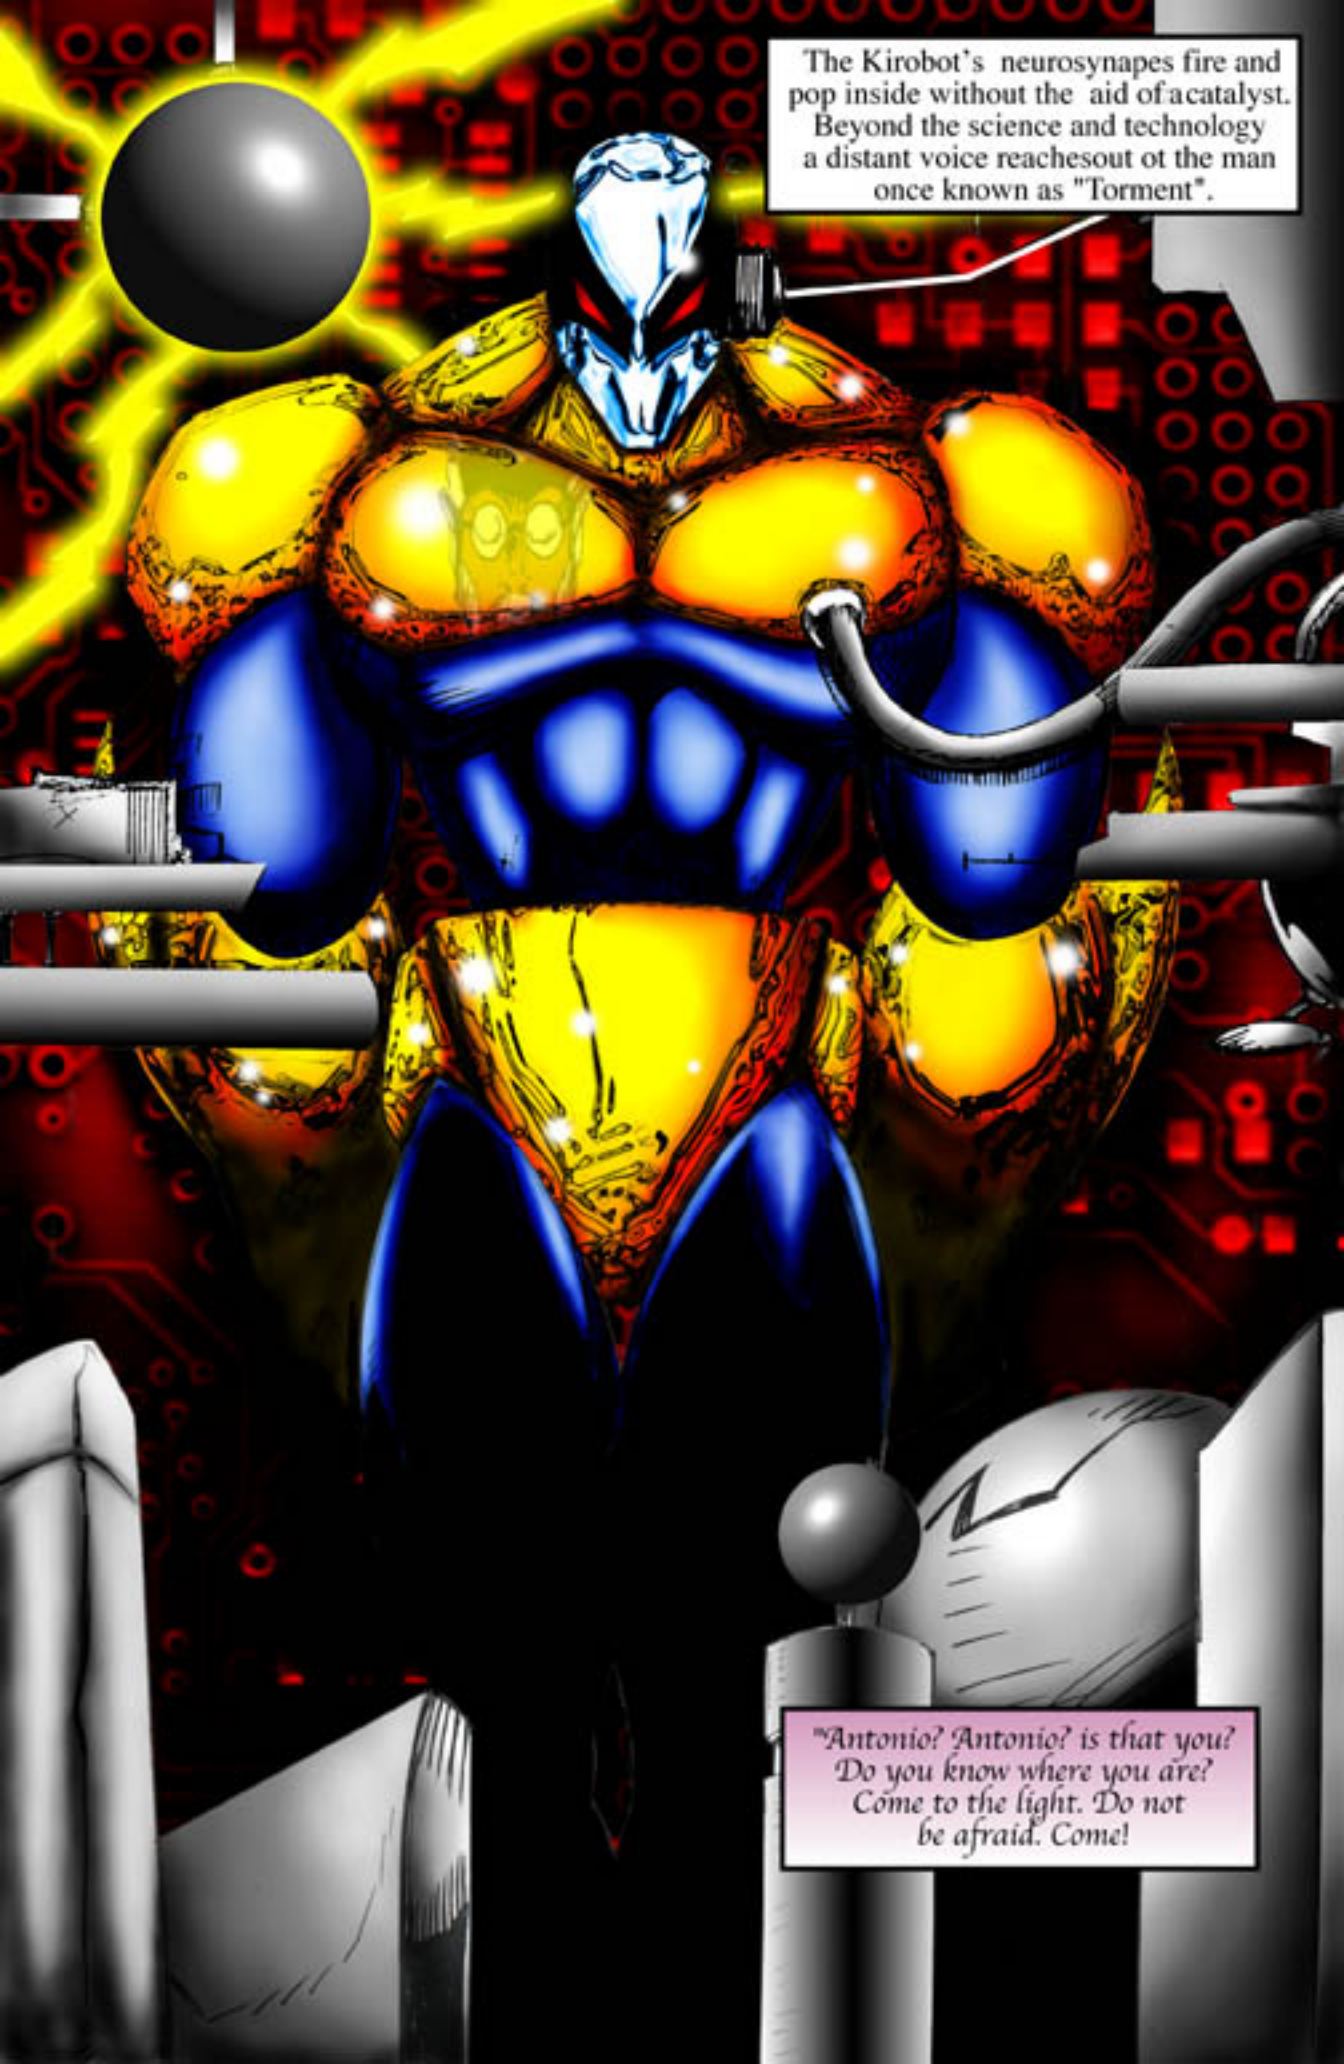

"Arm
saber
check."

"All weapons systems check.
We are fully operational."

"My experiment is a
complete success.
Now for the demonstration."

The Kirobot's neurosynapses fire and pop inside without the aid of a catalyst. Beyond the science and technology a distant voice reaches out of the man once known as "Torment".

"Antonio? Antonio? is that you?
Do you know where you are?
Come to the light. Do not
be afraid. Come!
